# VERVE XR3D

VISUALS THAT BLUR THE LINE.

## HI THERE!

At Verve XR3D, we don't just create renderings—we craft visual experiences that help you see your space before it's built. Whether you're an architect, interior designer, developer, or dreamer with a vision, you're in the right place.

We believe the journey from concept to creation should feel clear, collaborative, and incredibly visual. That's why we combine design thinking, advanced AI tech, and high-end rendering tools to help bring your ideas to life—with detail, depth, and realism that's hard to believe.

So take a look around. Let's create something stunning together.

# ABOUT COMPANY

Verve XR3D is a next-generation 3D rendering and visualization studio, built at the intersection of design artistry and technological innovation.

Led by Robben Chopra, the studio creates hyperrealistic visuals for interior and architectural projects that help designers, architects, and developers communicate their ideas with clarity and impact.

At the core of our process is AI-enhanced rendering technology, allowing us to cut rendering times by nearly 50% and even generate early-stage concept visuals in a matter of minutes. Powered by Intel i9 processors, NVIDIA RTX GPUs, and refined visualization workflows, Verve XR3D delivers visuals that are fast, precise, and emotionally resonant.

## OUR STORY

Verve XR3D was founded by Robben Chopra, a highly skilled interior designer known for his refined design sensibility and deep understanding of luxury spaces. After spending years crafting high-end interiors, Robben noticed a recurring challenge: while clients loved the concepts, they often struggled to truly visualize the space before execution. Mood boards and technical drawings just weren't enough.

What began as an internal solution to help clients "see" their designs turned into a dedicated passion project—leveraging advanced rendering tools to create visuals so real, they didn't need explanation. As demand grew, so did the vision.

Verve XR3D was born out of the desire to bridge the gap between design intent and visual clarity. Today, it stands as a studio where design thinking meets technology, enabling architects, designers, and developers to present their concepts in a way that's immersive, emotionally resonant, and crystal clear.

From luxury homes to hospitality concepts and beyond, every frame we create is rooted in real design logic—crafted not just to impress, but to express.

# CEO MESSAGE

Robben Chopra

As a designer, I've always believed that great spaces aren't just built—they're first imagined with absolute clarity. Over the years, I saw how often that clarity was lost in translation—between drawings, mood boards, and site meetings. That's why I created Verve XR3D.

This studio isn't just about rendering beautiful visuals—it's about making design feel real before it exists. Whether it's a luxury residence or a hospitality concept, our goal is to help you see your project as vividly as you've envisioned it.

With a background in interior design and a team equipped with the latest in AI-powered technology, we've built Verve XR3D to bridge the gap between vision and visualization. Because your ideas deserve more than just explanation—they deserve to be experienced.

Thank you for trusting us to bring your concepts to life, pixel by pixel.

– Robben Chopra  
Founder & Creative Director, Verve XR3D

# VISION & MISSION

## Vision

At Verve XR3D, our vision is to redefine how design is experienced by creating photorealistic visuals that allow clients to fully see and feel their spaces before they're built. By combining interior design expertise with cutting-edge rendering technology and AI-powered workflows, we aim to set a new standard in architectural visualization—where every image is immersive, every render is emotionally resonant, and every idea is brought to life with clarity and impact.

## Mission

Our mission is to empower architects, designers, and developers by delivering stunning, photorealistic visuals that bring their ideas to life—quickly, accurately, and beautifully. We are committed to combining design sensitivity with high-performance technology and AI to produce immersive renderings, walkthroughs, and VR experiences that enhance clarity, streamline decision-making, and elevate the way spaces are communicated long before construction begins.

## OUR SERVICE

### 3D Renderings

We create photorealistic renders for all types of interior spaces—including bedrooms, living rooms, bathrooms, kitchens, dining areas, and more. Each image is designed to reflect exact lighting, material finishes, textures, and spatial depth—so your clients can experience the room before it's built.

### 3D Exterior Visualization

We create photorealistic renders for all types of interior spaces—including bedrooms, living rooms, bathrooms, kitchens, dining areas, and more. Each image is designed to reflect exact lighting, material finishes, textures, and spatial depth—so your clients can experience the room before it's built.

### 360° Panoramic Views

We produce fully immersive 360° renders that allow clients to explore a space interactively—ideal for websites, virtual presentations, or VR integration. These panoramic visuals offer a complete perspective that flat renders simply can't match.

## OUR SERVICE

### Walkthrough Animations

Our cinematic-quality walkthroughs are crafted to show spatial flow, scale, and design intent through fluid motion. Perfect for pitch decks, developer presentations, or client reveals—these animations help communicate design far better than static images.

### 3D Virtual Reality (XR) Visuals

We generate VR-compatible outputs that allow users to experience spaces through a headset or mobile device. Great for premium real estate marketing, architectural showcases, or design validation in real time.

### Custom Visual Solutions

We offer flexible packages for studios, developers, and architects with recurring visualization needs. This includes hybrid bundles of renders, walkthroughs, and 360° views, tailored to the scale and style of each project.

## THE PROCESS

### Design Submission

Clients share layout, materials, lighting mood, and reference boards.

### Precision Rendering

Using high-end workstations powered by Intel i9s, NVIDIA RTX, and AI-enhanced tools, we craft detailed and immersive visuals.

### Revisions & Refinement

One round of color/material tweaks is included. Additional changes available on request.

### Final Delivery

High-resolution stills, 360° views, or walkthrough animations delivered in ready-to-use formats.

# THE RATE CARD

## Standalone Ultra-Realistic Rendering

Bedroom / Washroom

Price: \$150 USD

Views: 2 high-resolution photorealistic renders

Revisions: 1 round (color/material only)

Living Room / Drawing Room (Up to 500 sq. ft.)

Price: \$250 USD

Views: 4 high-resolution renders

Revisions: 1 round (color/material only)

Kitchen / Dining Area (Up to 300 sq. ft.)

Price: \$150 USD

Views: 2 high-resolution renders

Revisions: 1 round (color/material only)

## Standalone Full Apartment / Villa Rendering

Price: \$1 USD per sq. ft.

Deliverables: 10-20 renders based on layout

Revisions: 1 per space (color/material only)

Add-ons: Extra views, walkthroughs, 360°/VR output quoted separately

### Additional Revisions

Price: \$20 USD per revision (after included round)

Applies to: Color/material tweaks, camera changes, lighting edits

### Additional Views

Price: Charged at full original view rate

# THE RATE CARD

## Exterior Rendering

Single Façade / Building View

Price: \$300 USD

Views: 1 photorealistic render

Revisions: 1 (lighting/materials only)

Add-ons: Extra angles, site context, or  
landscaping billed additionally

## Add-On Services

360° Panoramic / VR / XR Output

As Add-On: \$250 USD

As Standalone: \$350 USD

Includes: Fully immersive view,  
compatible with VR headsets and  
web/mobile viewers

## Walkthrough Animation

Starting at: \$350 USD per 30 seconds

Includes: Camera path, smooth  
transitions, lighting, and render

## Retainer Package

Monthly Retainer Plan

Price: \$950 USD + GST per month

Deliverables: Up to 20 ultra-realistic still  
renders, 2 panoramic 360°/VR outputs,  
1 revision per view (color/material only)

**Commitment: 3-month lock-in**

Ideal For: Architects, interior designers, builders, developers

Extras: Discounted pricing on additional renders, animations, or VR outputs
